Estimate of Quantity: It is estimated that the County will use approximately 12,400 tons of Type BP-1 mix in 2019. 10,200 tons of BP-1 will be for asphalt overlays. The remainder will be for miscellaneous pavement repairs. The bidder's attention is called to the fact that the quantity of material to be furnished under these specifications is approximate and the right is reserved to increase or diminish quantity as may be necessary.

Asphalt Cement Price Index Specification

1.0 Asphalt Cement Price Index Adjustments will be made to the payments due the Contractor for any plant mix bituminous base, plant mix bituminous pavement, plant mix bituminous surface leveling and asphaltic concrete pavement when it has been determined that the monthly average price for the midpoint of the published prices of liquid asphalt cement has fluctuated from the monthly average price of the month the project was bid. The monthly base price will be the price from the last published Asphalt Weekly Monitor® prior to MoDOT's monthly bid opening. The Monthly Asphalt Index is posted on the MoDOT website as soon as possible for use in calculating the adjustments. The Monthly Asphalt Index recorded for the month of the project letting is the Asphalt Base Index for that project. For clarity, we will use the January 2022 price for the Camden County opening of February 16, 2023 as the price at the time of bid. The monthly base price, established prior to the monthly bid opening, shall apply to payment invoices for the following month.

1.1 The adjusted contract unit price will be applied to the actual amount of asphalt binder used by the Contractor for all asphalt items that are set up by the wet ton mix. The percentage of virgin asphalt as shown in the job mix formula approved for the project will be the basis for adjustments for any asphalt mix that has been placed on the project during the monthly index period. The effective asphalt obtained from the use of recycled asphalt pavement (RAP) will not be eligible for adjustment.

BID PROPOSAL #250128-A

- 2.0 Basis of Payment:** To determine the adjustment for any material specified in this provision the following formula will be used.

$$A = (B \times C) \times (D-E) \times T$$

Where:

- A = Adjustment for mix placed during monthly average index period
- B = Tons of Mix Placed during the monthly average index period
- C = % of virgin asphalt binder as listed in the job mix formula in use
- D = monthly average price at time mix placement
- E = monthly average price at time of bid
- T = 1.04225 to account for Missouri State use tax

- 3.0** The administrator will make adjustment payments, as defined above, for the applicable work completed during each month except for projects on which the contractor is being charged liquidated damages, due to working beyond the project completion date, in accordance with Sec 108. In this case the "D" value used for the price adjustment will either be the last "D" value prior to the date that liquidated damage assessment began or the current monthly "D" value, whichever is lower. If the contractor is being charge liquidated damages due to the contract being beyond the project completion date and the current months "D" value results in a deduction, then the current monthly "D" value will be used.
- 4.0 Optional** This provision is optional. If the bidder wishes to be bound by this provision, the bidder shall acknowledge the acceptance on the Bid form. Failure by the bidder to execute the acceptance form will be interpreted to mean election to not participate in the Asphalt Cement Price Index.
- 5.0 Delivery:** The supplier shall be capable of delivering approximately 1,200 tons per day to any area of Camden County. Asphaltic concrete materials shall be delivered at the time specified in the order for it. Telephone or verbal orders from the Road & Bridge Administrator, his duly authorized representative or from his office shall be as binding as written orders. Should the supplier in any event fail to deliver material at the time specified in the order, the Administrator or his representative shall be entitled to deduct from the payment due the supplier an amount equal to the combined wages of the County employees, or agents, for the period of time lost while awaiting the arrival of such material. The provisions of this paragraph shall be so construed as to require, among other things, concurrent delivery of materials throughout the day, when so requested.

Dear Rowland,

O'Reilly Auto Parts thanks you for inviting us to provide a response for bid 250128-B for automotive Batteries. Camden County currently purchases from O'Reilly Auto Parts using a program pricing structure which includes significant discounts for automotive batteries. The pricing guarantees a minimum discount of at least, 41% off of List price or better. We are including a list of the batteries identified in the bid which shows the List price and the Camden County price for each specific battery. You will see that the savings are more than 41% off of List price.

Among the County's accounts identified on the following page, the County has purchased more than \$7,000 in automotive batteries over the past 12 months at a net cost \$5,453.18. This is a 23.63% savings over full retail or "walk-in" cost. With the pricing structure in place, the more the County buys, the more money it saves. It is our opinion that the County should continue to utilize the program pricing so that we are providing the batteries at the greatest value.

If the County agrees, please confirm that you would like to continue using the program pricing for battery purchases with an email to probids@oreillyauto.com. Otherwise, we can remove the program pricing from the County's accounts and approach the bid considering only the estimated volume of purchases anticipated by the County itself – which would be closer to full retail based on the same volume purchased over the past 12 months.

Below is a list of the current, active Camden County accounts which utilize this pricing and the local O'Reilly Auto Parts stores located within Camden County. We look forward to continuing to be a valued supplier to the County for all its automotive, heavy-duty, and equipment needs.

AMERICAN MADE:

In accordance with the Domestic Product Procurement Act (hereinafter referred to as the Buy American Act) RSMo 34.350-34.359, the bidder is advised that any goods purchased or leased by any public agency where the purchase, lease or contract involves the expenditure of twenty-five thousand dollars (\$25,000) or more, shall be manufactured or produced in the United States. Section 34.350.2(1) of that Act specifies that the term “public agency” includes all political subdivisions of the State of Missouri, which definition includes counties.

The requirements of the Buy American Act shall not apply if other exceptions to the Buy American mandate in RSMo 34.353 are met.

If the bidder claims there is only one line of the good manufactured or produced in the United States, RSMo 34.353 (2), or that one of the exceptions of RSMo 34.353 (3) applies, the Department Head or Elected Official bears the burden of certification as required prior to the award of a contract.

In accordance with the Buy American Act, the bidder must provide proof of compliance with RSMo 34.353. Therefore the bidder should complete and return Exhibit A, certification regarding proof of compliance, with the bid. This document must be satisfactorily completed prior to an award of a contract.

RE: Vehicle & Equipment Filters Bid 250128-D
Bid Opening: March 25, 2025 10:00 AM

Dear Rowland,

O'Reilly Auto Parts thanks you for inviting us to provide a response for bid 250128-D for Vehicle & Equipment Filters. Camden County currently participates in a special program offered through our WIX filter supplier since February 1, 2018. This program allows the County to purchase light duty and heavy duty WIX filters at a discount of 50% off of factory jobber; which is usually between 75% - 80% off of List price. We are including a list of the filters identified in the bid and have crossed them over to the WIX brand filter part numbers. This chart shows the List price and the Camden County price for each specific WIX filter and the savings from List.

In addition to the one-year limited warranty offered through the manufacturer, WIX filters also come with the WIX guarantee that, if the filter fails and it damages the engine, WIX will replace the entire engine. Though the filters are not likely to suffer such a catastrophic failure, it is good to know that WIX offers the peace of mind that the tax payers will not have to foot the bill for a new, expensive engine such as a road grader.

Among the County's accounts identified below, the County has purchased more than \$8,300 in automotive filters over the past 12 months at a net cost of only \$4,626.80. This is a 55.69% savings over full retail or "walk-in" cost. With the pricing structure in place, the more the County buys, the more money it saves. It is our opinion that the County should continue to utilize the WIX discount program so that we are providing the highest quality filters at the best overall value.

Camden County Accounts:

- 77000 CAMDEN COUNTY COURT
- 137661 SOUTHWEST CAMDEN CO FIRE
- 408210 CAMDEN COUNTY PWSD 4
- 490608 CAMDEN COUNTY
- 495895 CAMDEN COUNTY

If the County agrees, please confirm that you would like to continue using the WIX discount program for filter purchases with an email to probids@oreillyauto.com. Otherwise, we can remove the discounted pricing from the County's accounts and approach the bid from our standard government pricing model considering only the County's potential purchase volume.

Below is a list of the local O'Reilly Auto Parts stores located within Camden County. We look forward to continuing to be a valued supplier to the County for all its automotive, heavy-duty, and equipment needs.

Pipe Requirements

ADS N-12 ST IB pipe (per AASHTO) shall have a smooth interior and annular exterior corrugations.

- 4- through 10-inch (100 to 250 mm) pipe shall meet AASHTO M252, Type S or SP.
- 12- through 60-inch (300 to 1500 mm) pipe shall meet AASHTO M294, Type S or SP, or ASTM F2306.
- Manning's "n" value for use in design shall be 0.012.

Joint Performance

The joint shall be soil-tight and gaskets for diameters 12- through 60-inch, shall meet the requirements of ASTM F477. For diameters 4- through 10-inch, the joint shall be soil-tight using an engaging dimple connection. Gaskets shall be installed by the pipe manufacturer and covered with a removable, protective wrap to ensure the gasket is free from debris. A joint lubricant available from the manufacturer shall be used on the gasket and bell during assembly.

Fittings

Fittings shall conform to AASHTO M252, AASHTO M294, or ASTM F2306. Bell and spigot connections shall utilize a welded bell and valley or saddle gasket meeting the soil-tight joint performance requirements of AASHTO M252, AASHTO M294, or ASTM F2306.

Material Properties

Material for pipe and fitting production shall be high density polyethylene conforming with the minimum requirements of cell classification 424420C for 4- through 10-inch (100 to 250 mm) diameters, and 435400C for 12- through 60-inch (300 to 1500 mm) diameters, as defined and described in the latest version of ASTM D3350, except that carbon black content should not exceed 4%. The 12- through 60-inch (300 to 1500 mm) pipe material shall comply with the notched constant ligament-stress (NCLS) test as specified in Sections 9.5 and 5.1 of AASHTO M294 and ASTM F2306, respectively.

Installation

Installation shall be in accordance with ASTM D2321 and ADS recommended installation guidelines, with the exception that minimum cover in trafficked areas for 4- through 48-inch (100 to 1200 mm) diameters shall be one foot. (0.3 m) and for 60-inch (1500 mm) diameter the minimum cover shall be 2 ft. (0.6 m) in single run applications. Backfill for minimum cover situations shall consist of Class 1 (compacted), Class 2 (minimum 90% SPD) or Class 3 (minimum 95% SPD) material. Maximum fill heights depend on embedment material and compaction level; please refer to Technical Note 2.01. BID PROPOSAL 250128-G

Asphalt Cement Price Index Specification

1.0 Asphalt Cement Price Index Adjustments will be made to the payments due the Contractor for any plant mix bituminous base, plant mix bituminous pavement, plant mix bituminous surface leveling and asphaltic concrete pavement when it has been determined that the monthly average price for the midpoint of the published prices of liquid asphalt cement has fluctuated from the monthly average price of the month the project was bid. The monthly base price will be the price from the last published Asphalt Weekly Monitor® prior to MoDOT's monthly bid opening. The Monthly Asphalt Index is posted on the MoDOT website as soon as possible for use in calculating the adjustments. The Monthly Asphalt Index recorded for the month of the project letting is the Asphalt Base Index for that project.

1.1 The adjusted contract unit price will be applied to the actual amount of asphalt binder used by the Contractor for all asphalt items that are set up by the wet ton mix. The percentage of virgin asphalt as shown in the job mix formula approved for the project will be the basis for adjustments for any asphalt mix that has been placed on the project during the monthly index period. The effective asphalt obtained from the use of recycled asphalt pavement (RAP) will not be eligible for adjustment. The base price index for PG64-22 will be applied to the asphalt mix for mixes using PG64-22, PG70-22 or PG76-22.

2.0 Basis of Payment To determine the adjustment for any material specified in this provision the following formula will be used.

$$A = (B \times C) \times (D - E) \times T$$

Where:

- A = Adjustment for mix placed during monthly average index period
- B = Tons of Mix Placed during the monthly average index period
- C = % of virgin asphalt binder as listed in the job mix formula in use
- D = monthly average price at time mix placement
- E = monthly average price at time of bid
- T = 1.04225 to account for Missouri State use tax

3.0 The Administrator will make adjustment payments, as defined above, for the applicable work completed during each month except for projects on which the contractor is being charged liquidated damages, due to working beyond the project completion date, in accordance with Sec 108. In this case the "D" value used for the price adjustment will either be the last "D" value prior to the date that liquidated damage assessment began or the current monthly "D" value, whichever is lower. If the contractor is being charge liquidated damages due to the contract being beyond the project completion date and the current months "D" value results in a deduction, then the current monthly "D" value will be used.

4.0 Optional This provision is optional. If the bidder wishes to be bound by this provision, the bidder shall acknowledge the acceptance on the Addendum form. Failure by the bidder to execute the acceptance form will be interpreted to mean election to not participate in the Asphalt Cement Price Index.

In accordance with the Buy American Act, the bidder must provide proof of compliance with RSMo 34.353. Therefore the bidder should complete and return Exhibit A, certification regarding proof of compliance, with the bid. This document must be satisfactorily completed prior to an award of a contract.

BID PROPOSAL 250128-G

Asphalt Cement Price Index Specification

1.0 Asphalt Cement Price Index Adjustments will be made to the payments due the Contractor for any plant mix bituminous base, plant mix bituminous pavement, plant mix bituminous surface leveling and asphaltic concrete pavement when it has been determined that the monthly average price for the midpoint of the published prices of liquid asphalt cement has fluctuated from the monthly average price of the month the project was bid. The monthly base price will be the price from the last published Asphalt Weekly Monitor® prior to MoDOT's monthly bid opening. The Monthly Asphalt Index is posted on the MoDOT website as soon as possible for use in calculating the adjustments. The Monthly Asphalt Index recorded for the month of the project letting is the Asphalt Base Index for that project.

1.1 The adjusted contract unit price will be applied to the actual amount of asphalt binder used by the Contractor for all asphalt items that are set up by the wet ton mix. The percentage of virgin asphalt as shown in the job mix formula approved for the project will be the basis for adjustments for any asphalt mix that has been placed on the project during the monthly index period. The effective asphalt obtained from the use of recycled asphalt pavement (RAP) will not be eligible for adjustment. The base price index for PG64-22 will be applied to the asphalt mix for mixes using PG64-22, PG70-22 or PG76-22.

2.0 Basis of Payment To determine the adjustment for any material specified in this provision the following formula will be used.

$$A = (B \times C) \times (D - E) \times T$$

Where:

- A = Adjustment for mix placed during monthly average index period
- B = Tons of Mix Placed during the monthly average index period
- C = % of virgin asphalt binder as listed in the job mix formula in use
- D = monthly average price at time mix placement
- E = monthly average price at time of bid
- T = 1.04225 to account for Missouri State use tax

3.0 The Administrator will make adjustment payments, as defined above, for the applicable work completed during each month except for projects on which the contractor is being charged liquidated damages, due to working beyond the project completion date, in accordance with Sec 108. In this case the "D" value used for the price adjustment will either be the last "D" value prior to the date that liquidated damage assessment began or the current monthly "D" value, whichever is lower. If the contractor is being charge liquidated damages due to the contract being beyond the project completion date and the current months "D" value results in a deduction, then the current monthly "D" value will be used.

4.0 Optional This provision is optional. If the bidder wishes to be bound by this provision, the bidder shall acknowledge the acceptance on the Addendum form. Failure by the bidder to execute the acceptance form will be interpreted to mean election to not participate in the Asphalt Cement Price Index.

BID PROPOSAL 250128-G

for it. Telephone or verbal orders from the Highway Administrator, his duly authorized representative or from his office shall be as binding as written orders. Deliveries shall be made upon eighteen hours advance notice. Should the supplier in any event fail to deliver or apply the material at the time specified in the order, or at the temperatures required under these specifications, the Administrator shall be entitled to deduct from the payment due such supplier an amount equal to the combined wages of the County Employees, or agents, for the period of time lost while awaiting the arrival of such material or the heating of such material to required temperature. The provisions of this paragraph shall be so construed as to require, among other things, concurrent delivery and/or application of materials throughout the day, when so requested.

METHOD OF DELIVERY AND APPLICATION: Asphaltic materials shall be delivered in distributors and pumped from the distributors into auxiliary equipment. Hand pouring pots or hose and nozzle shall not be used, except where special conditions make it impractical to use a spraybar, and then only with the permission of the Highway Administrator or his authorized representative.

Because of the vast road network in Camden County and the number of substandard bridges still in use, weight limits of loaded trucks have to be restricted frequently. This may require inconvenience and use of additional equipment to supply the requested quantities to various projects and in unusual circumstances be further restricted to partial load, without any additional compensation.

EQUIPMENT: The bidder, at least three working days prior to the date and hour of opening of proposals, shall certify that he has sufficient storage capacity located within a reasonable distance of the City of Camden to allow for at plant pick-ups by the County Road & Bridge Department. That he can supply two (2) supply tankers of 5,000 gallons or more capacity. In addition to the above, the bidder must show that he has been engaged in the distribution of Bituminous Material for a period of at least one year. Proposals submitted by bidders failing or neglecting to furnish satisfactory statements will be considered as suppliers only.

MEASUREMENT AND COMPENSATION: Strict compliance with the directions of the Highway Administrator or his duly authorized representative and with the provisions of the specifications and the terms of the contract shall entitle the supplier to payments equal to the value of the material delivered and accepted.

All types of grades of Asphaltic materials herein specified under "BITUMINOUS MATERIALS FOR HIGHWAY CONSTRUCTION AND MAINTENANCE" shall be measured on a gallon basis at 60 degrees Fahrenheit temperature.

The material required under this agreement shall be paid for by the gallon of material delivered and accepted.

BITUMINOUS MATERIALS FOR HIGHWAY CONSTRUCTION AND MAINTENANCE

SCOPE: These specifications cover all types and grades of bituminous materials for highway construction and maintenance.

Materials supplied on this contract shall meet the requirements and specifications as laid out in:

BID PROPOSAL 250128-G

AMERICAN MADE:

In accordance with the Domestic Product Procurement Act (hereinafter referred to as the Buy American Act) RSMo 34.350-34.359, the bidder is advised that any goods purchased or leased by any public agency where the purchase, lease or contract involves the expenditure of twenty-five thousand dollars (\$25,000) or more, shall be manufactured or produced in the United States. Section 34.350.2(1) of that Act specifies that the term “public agency” includes all political subdivisions of the State of Missouri, which definition includes counties.

The requirements of the Buy American Act shall not apply if other exceptions to the Buy American mandate in RSMo 34.353 are met.

If the bidder claims there is only one line of the good manufactured or produced in the United States, RSMo 34.353 (2), or that one of the exceptions of RSMo 34.353 (3) applies, the Department Head or Elected Official bears the burden of certification as required prior to the award of a contract.

In accordance with the Buy American Act, the bidder must provide proof of compliance with RSMo 34.353. Therefore the bidder should complete and return Exhibit A, certification regarding proof of compliance, with the bid. This document must be satisfactorily completed prior to an award of a contract.

All references to Sections and Articles in this Special Provision shall be construed to mean specific Sections and Articles in the Standard Specifications for Road and Bridge Construction adopted by the Department of Transportation.

Description. This work shall consist of in-place rehabilitation of hot-mix asphalt (HMA) pavement by heating, scarifying, rejuvenating, and reshaping the surface followed by the addition of a new HMA surface course according to the thickness specified on the plans.

Materials. Materials shall be according to the following.

Item Article/Section	
(a) Rejuvenating Agent (Note 1)	
(b) Hot-Mix Asphalt	1030

Note 1. The rejuvenating agent shall have a minimum Aged Penetration Retention of 90% when tested according to the following test procedure:

- a. Determine the penetration¹ of an unaged standard PG 58-22 asphalt binder.
- b. Age² the asphalt binder in the Rolling Thin Film Oven (RTFO).
- c. Determine the penetration¹ of the aged binder (A).
- d. Add the rejuvenating agent or rejuvenating agent residue³ at the percentage recommended by the manufacturer (maximum 20% by weight) to the aged binder. Blend uniformly.
- e. Determine the penetration¹ of the rejuvenating agent / aged binder mixture. The penetration of this mixture shall be essentially equivalent to the penetration of the unaged PG 58-22.
- f. Age² the rejuvenating agent / aged binder mixture in the RTFO.
- g. Determine the penetration¹ of the aged rejuvenating agent / aged binder mixture (B).
- h. Determine the Aged Penetration Retention according to the following formula:

Aged Penetration Retention, % = (B/A)x100

1 AASHTO T 49 at 77°F (25°C).

2 AASHTO T 240 aged for 5 hours at 325°F (163°C).

3 If the rejuvenating agent is an emulsion, obtain the residue according to the test procedure "Emulsified Asphalt Residue by Evaporation" located in AASHTO T 59.

LR400-3

Equipment. Equipment shall be according to the following.

Item Article/Section	
(a) Rollers	1101.01
(b) Pre-heater (Note 1)	

BID PROPOSAL #250128-HR

(c) Heater-Scarifier (Note 2)

Note 1. The pre-heater shall be a separate independently self-propelled heating unit.

Note 2. The heater-scarifier shall be self-contained, power propelled unit capable of heating, scarifying, adding rejuvenating agent, mixing, and screeding the scarified asphalt surface.

The heating system shall use propane, fuel oil, or butane as fuel, capable of being turned on or off instantly and have a range of width to heat 4-inches beyond each side of the lane width. Heating of the asphalt pavement surface shall be accomplished in such a manner that adequate heat penetration is provided without excessive oxidation, or direct flame contact with the asphalt street. The heaters shall have an enclosed or shielded hood and allow for the pavement to be scarified to the specified depth with the surface temperature of the old pavement not exceeding 375°F (190°C). The machine shall be equipped with a minimum of two rows of spring-mounted scarification teeth. Teeth shall be evenly spaced with the rows offset by an amount equal to one-half of the tooth spacing. Teeth shall be capable of vertical movement, such that the rows of the teeth will follow any contours in the street profile to scarify to the required depth regardless of depression or high areas. Self-regulating controls shall be used to exert pressure from the weight of the machine onto the tooth mounting system, and to control the depth of scarification. The aggregate shall be dislodged, but not fractured, to the specified depth.

The machine shall be capable of adding rejuvenating agent uniformly over the area to be scarified at a uniform rate per distance traveled.

The machine shall be capable of lateral movement of the scarified materials as required, by using a reversible auger and/or adjustable blades. This system shall be capable of maintaining a uniform supply of scarified material distributed as required across the face if the spreader screed.

The heater-scarifier shall be equipped with an automatic electronic grade control device. The device shall be effective in leveling depressions. The device shall be capable of controlling the elevation of the screed relative to either a preset grade control string line or a grade reference device traveling on the adjacent pavement surface. The traveling grade reference device shall be not less than 30 ft (9 m) in length.

The screed or strike off assembly shall effectively produce a finished surface of the required evenness and texture without tearing, shoving or gouging the mixture.

CONSTRUCTION REQUIREMENTS

General. The entire surface to be rehabilitated shall be free of water, soil, vegetation, and foreign material. All base failures shall be repaired prior to the heating scarifying process

BID PROPOSAL #250128-HR

according to Section 358. Rehabilitation work shall be performed only when the air temperature in the shade is at least 45 °F (7 °C) and the forecast is for rising temperatures.

The surface of the existing pavement shall be heated with a continuously moving heater to allow the pavement to be scarified to a 0.75 to 1.5 in (20 to 38 mm) average depth with the surface temperature of the old pavement not to exceed 375 °F (190 °C). Heat shall be applied under an enclosed or shielded hood and shall extend at least 4 in. (100 mm) beyond the width of scarification on both sides. Scarifying shall be accomplished with pressure scarifiers. The scarifying unit shall be equipped to scarify and move material away from the gutter flags for a depth of 1/2 in. (13 mm) by 4 in. (100 mm) wide. The heating-scarifying operation shall not exceed 30 ft (10 m) per minute. When a repaving pass is being made adjacent to a previously placed mat, the longitudinal repaving seam shall extend at least 2 in. (50 mm) into the previously placed mat.

Immediately after the scarifying operation, the rejuvenating agent shall be applied at the maximum rate of 0.20 gal/sq yd (0.5 L/sq m). The actual rate will be determined by the Contractor based on pavement condition, rejuvenating agent, and pavement samples. The Contractor will provide the Engineer with the application rate prior to construction. The application rate should not vary by more than ± 0.03 gal/sq yd (± 0.1 L/sq m) unless existing pavement conditions change. Any modification of the application rate shall be approved by the Engineer. The surface shall then be leveled by distributing the heated, scarified and treated (HST) material over the width being processed so as to produce a uniform cross section. The minimum temperature of the HST material after leveling shall be 175 °F (80 °C). The HST material shall be compacted before the temperature of the mix drops below 150 °F (65 °C).

Compaction shall be accomplished by performing a growth curve within the first half mile of production. If an adjustment is made to the rejuvenating agent's application rate, the Engineer reserves the right to request an additional growth curve. The growth curve, consisting of a plot of lb/cu ft (kg/cu m) vs. number of passes with the project breakdown roller, shall be developed. Roller speed during the growth curve testing shall be the same as the normal paving operation. This curve shall be established by use of a nuclear gauge. Tests shall be taken after each pass until the highest lb/cu ft (kg/cu m) is obtained. This value shall be the target density.

A new growth curve is required if the breakdown roller used on the growth curve is replaced with a new roller during production. The target density shall apply only to the specific gauge used. If additional gauges are to be used to determine density specification compliance, the Contractor shall establish a unique minimum allowable target density from the growth curve location for each gauge.

Traffic control shall be provided to insure safety of traveling public as well as the Road Districts and contractor's employees. One lane shall be open to traffic unless approved by the Road and Bridge Administrator or County Commissioners.

All loose material shall be swept from the road surface by the contractor prior to application of tack oil.

Prime cost to be included in unit cost of asphalt laid in place. Rate of application to be .25 gallons per square yard.

In accordance with the Domestic Product Procurement Act (hereinafter referred to as the Buy American Act) RSMo 34.350-34.359, the bidder is advised that any goods purchased or leased by any public agency where the purchase, lease or contract involves the expenditure of twenty-five thousand dollars (\$25,000) or more, shall be manufactured or produced in the United States. Section 34.350.2(1) of that Act specifies that the term “public agency” includes all political subdivisions of the State of Missouri, which definition includes counties.

The requirements of the Buy American Act shall not apply if other exceptions to the Buy American mandate in RSMo 34.353 are met.

If the bidder claims there is only one line of the good manufactured or produced in the United States, RSMo 34.353 (2), or that one of the exceptions of RSMo 34.353 (3) applies, the Department Head or Elected Official bears the burden of certification as required prior to the award of a contract.

In accordance with the Buy American Act, the bidder must provide proof of compliance with RSMo 34.353. Therefore the bidder should complete and return Exhibit A, certification regarding proof of compliance, with the bid. This document must be satisfactorily completed prior to an award of a contract.

BID PROPOSAL 250128-M

AMERICAN MADE:

In accordance with the Domestic Product Procurement Act (hereinafter referred to as the Buy American Act) RSMo 34.350-34.359, the bidder is advised that any goods purchased or leased by any public agency where the purchase, lease or contract involves the expenditure of twenty-five thousand dollars (\$25,000) or more, shall be manufactured or produced in the United States. Section 34.350.2(1) of that Act specifies that the term "public agency" includes all political subdivisions of the State of Missouri, which definition includes counties.

The requirements of the Buy American Act shall not apply if other exceptions to the Buy American mandate in RSMo 34.353 are met.

If the bidder claims there is only one line of the good manufactured or produced in the United States, RSMo 34.353 (2), or that one of the exceptions of RSMo 34.353 (3) applies, the Department Head or Elected Official bears the burden of certification as required prior to the award of a contract.

In accordance with the Buy American Act, the bidder must provide proof of compliance with RSMo 34.353. Therefore the bidder should complete and return Exhibit A, certification regarding proof of compliance, with the bid. This document must be satisfactorily completed prior to an award of a contract.

As defined in 34.350 RSMo, United States means the United States of America, the District of Columbia, and all territories and possessions subject to the jurisdiction of the United States. AMERICAN MADE:

In accordance with the Domestic Product Procurement Act (hereinafter referred to as the Buy American Act) RSMo 34.350-34.359, the bidder is advised that any goods purchased or leased by any public agency where the purchase, lease or contract involves the expenditure of twenty-five thousand dollars (\$25,000) or more, shall be manufactured or produced in the United States. Section 34.350.2(1) of that Act specifies that the term "public agency" includes all political subdivisions of the State of Missouri, which definition includes counties.

The requirements of the Buy American Act shall not apply if other exceptions to the Buy American mandate in RSMo 34.353 are met.

If the bidder claims there is only one line of the good manufactured or produced in the United States, RSMo 34.353 (2), or that one of the exceptions of RSMo 34.353 (3) applies, the Department Head or Elected Official bears the burden of certification as required prior to the award of a contract.

In accordance with the Buy American Act, the bidder must provide proof of compliance with RSMo 34.353. Therefore the bidder should complete and return Exhibit A, certification regarding proof of compliance, with the bid. This document must be satisfactorily completed prior to an award of a contract.

- **AMERICAN MADE:**
 - In accordance with the Domestic Product Procurement Act (hereinafter referred to as the Buy American Act) RSMo 34.350-34.359, the bidder is advised that any goods purchased or leased by any public agency where the purchase, lease or contract involves the expenditure of twenty-five thousand dollars (\$25,000) or more, shall be manufactured or produced in the United States. Section 34.350.2(1) of that Act specifies that the term “public agency” includes all political subdivisions of the State of Missouri, which definition includes counties.
 - The requirements of the Buy American Act shall not apply if other exceptions to the Buy American mandate in RSMo 34.353 are met.
 - If the bidder claims there is only one line of the good manufactured or produced in the United States, RSMo 34.353 (2), or that one of the exceptions of RSMo 34.353 (3) applies, the Department Head or Elected Official bears the burden of certification as required prior to the award of a contract.
 - In accordance with the Buy American Act, the bidder must provide proof of compliance with RSMo 34.353. Therefore the bidder should complete and return Exhibit A, certification regarding proof of compliance, with the bid. This document must be satisfactorily completed prior to an award of a contract.

BID PROPOSAL 250128-M

AMERICAN MADE:

In accordance with the Domestic Product Procurement Act (hereinafter referred to as the Buy American Act) RSMo 34.350-34.359, the bidder is advised that any goods purchased or leased by any public agency where the purchase, lease or contract involves the expenditure of twenty-five thousand dollars (\$25,000) or more, shall be manufactured or produced in the United States. Section 34.350.2(1) of that Act specifies that the term "public agency" includes all political subdivisions of the State of Missouri, which definition includes counties.

The requirements of the Buy American Act shall not apply if other exceptions to the Buy American mandate in RSMo 34.353 are met.

If the bidder claims there is only one line of the good manufactured or produced in the United States, RSMo 34.353 (2), or that one of the exceptions of RSMo 34.353 (3) applies, the Department Head or Elected Official bears the burden of certification as required prior to the award of a contract.

In accordance with the Buy American Act, the bidder must provide proof of compliance with RSMo 34.353. Therefore the bidder should complete and return Exhibit A, certification regarding proof of compliance, with the bid. This document must be satisfactorily completed prior to an award of a contract.

AMERICAN MADE:

In accordance with the Domestic Product Procurement Act (hereinafter referred to as the Buy American Act) RSMo 34.350-34.359, the bidder is advised that any goods purchased or leased by any public agency where the purchase, lease or contract involves the expenditure of twenty-five thousand dollars (\$25,000) or more, shall be manufactured or produced in the United States. If the bidder claims there is only one line of the good manufactured or produced in the United States, RSMo 34.353 (2), or that one of the exceptions of RSMo 34.353 (3) applies, the Department Head or Elected Official bears the burden of certification as required prior to the award of a contract.

In accordance with the Buy American Act, the bidder must provide proof of compliance with RSMo 34.353. Therefore the bidder should complete and return Exhibit A, certification regarding proof of compliance, with the bid. This document must be satisfactorily completed prior to an award of a contract.

AMERICAN MADE:

In accordance with the Domestic Product Procurement Act (hereinafter referred to as the Buy American Act) RSMo 34.350-34.359, the bidder is advised that any goods purchased or leased by any public agency where the purchase, lease or contract involves the expenditure of twenty-five thousand dollars (\$25,000) or more, shall be manufactured or produced in the United States. Section 34.350.2(1) of that Act specifies that the term "public agency" includes all political subdivisions of the State of Missouri, which definition includes counties.

The requirements of the Buy American Act shall not apply if other exceptions to the Buy American mandate in RSMo 34.353 are met.

If the bidder claims there is only one line of the good manufactured or produced in the United States, RSMo 34.353 (2), or that one of the exceptions of RSMo 34.353 (3) applies, the Department Head or Elected Official bears the burden of certification as required prior to the award of a contract.

In accordance with the Buy American Act, the bidder must provide proof of compliance with RSMo 34.353. Therefore the bidder should complete and return Exhibit A, certification regarding proof of compliance, with the bid. This document must be satisfactorily completed prior to an award of a contract.

As defined in 34.350 RSMo, United States means the United States of America, the District of Columbia, and all territories and possessions subject to the jurisdiction of the United States. If the bidder claims there is only one line of the good manufactured or produced in the United States, RSMo 34.353 (2), or that one of the exceptions of RSMo 34.353 (3) applies, the Department Head or Elected Official bears the burden of certification as required prior to the award of a contract.

In accordance with the Buy American Act, the bidder must provide proof of compliance with RSMo 34.353.
